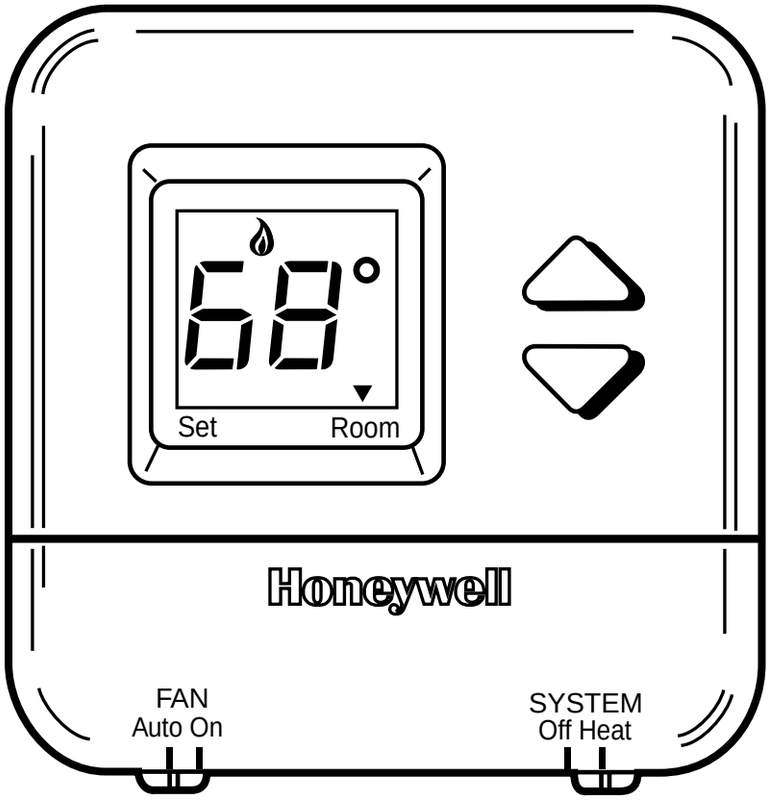
Honeywell

Electronic Thermostat

TRADELINE®

OWNER'S GUIDE



M14750

69-1492

Congratulations on the purchase of your new thermostat! Over 100 years of Honeywell engineering expertise went into the making of this thermostat in an effort to provide you with a more comfortable and convenient living environment.

- *Simple and easy to use*. The ▲ and ▼ keys make it easy for you to change your temperature setting.

- *Large digital display.* You can easily read the current room temperature at a glance.

- *No need for batteries.* Batteries are not required because your temperature settings are held permanently in memory.

Settings

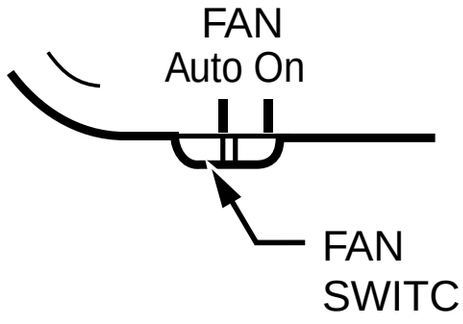
Setting FAN and SYSTEM Switches

Fan and system settings are controlled by using FAN and SYSTEM switches located on the bottom of the thermostat case.

First set the FAN switch (not available on all models):

Auto: Normal setting for most homes. In heating, the fan may start a few minutes after the heating equipment comes on.

On: The fan runs continuously. Use for improved air circulation and air quality.

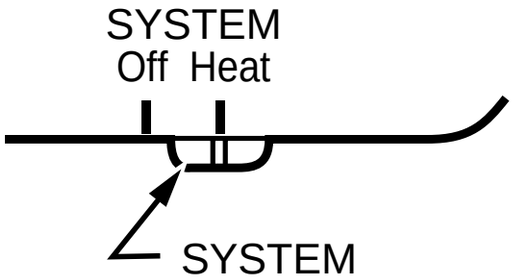


M10273

Then set the SYSTEM switch:

Off: Heating is off.

Heat: Normal setting for months when your home needs heating. Digital display shows a flame when heating is on.



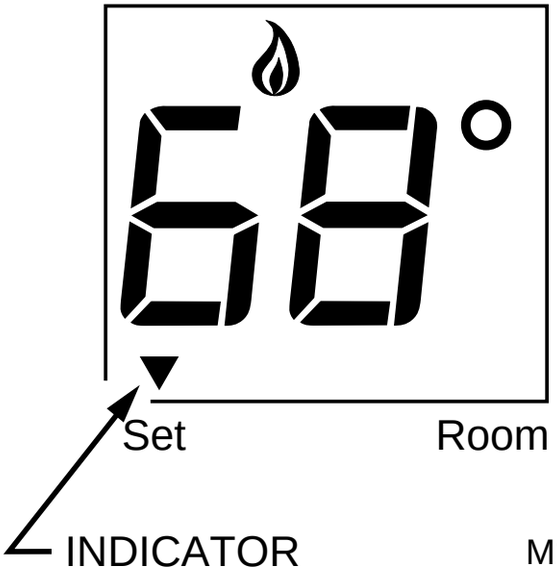
M10975

Displaying Temperature Setting

NOTE: Your temperature setting can be set anywhere from 40° to 99°F (5° to 37°C).

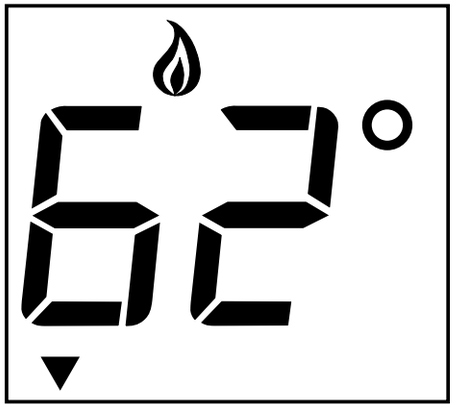
The temperature setting and the room temperature are shown separately on the digital display. The ▼ indicator points to **Set** when the temperature setting is displayed and to **Room** when the room temperature is displayed.

1. To display the temperature setting on the digital display, press either the ▲ or ▼ key once.



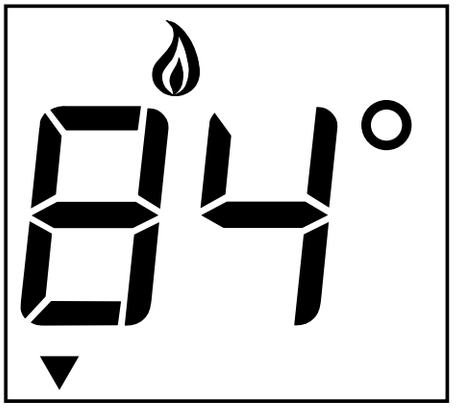
Changing Temperature Setting

1. To lower the temperature setting, press the ▼ key.



M10276

2. To raise the temperature setting, press the ▲ key.



M10982

When in the heating mode, lowering the temperature at night or during the day can lower your energy costs.

Troubleshooting Guide

Heating does not come on.

- Check that the SYSTEM switch on the thermostat is set to Heat.
- Check the system fuse or circuit breaker and replace or reset if necessary.
- Check for air movement at the register.
- Check power to the heating equipment.

Temperature setting is too warm or cool.

- Adjust the temperature by pressing either the ▲ or ▼ key.

If you have questions concerning this thermostat, call Honeywell Customer Assistance at 1-800-468-1502, Monday-Friday, 7:00 am-5:30 pm, Central time.
